3) [ ログ処理 ] メニューから [ Panasonic V-Log ] を選択します。

The screenshot displays the Final Cut Pro X 10.3 interface. The main preview window shows a scene with a clock and a person. The right-hand sidebar contains the 'Properties' panel for the selected clip, showing technical details like resolution (4096 x 2160) and frame rate (23.98p). Below this, the 'Log Processing' menu is open, listing various color profiles. The 'Panasonic V-Log' option is highlighted with a blue selection bar and a red circle. Other options include 'None', 'ARRI Log C', 'Blackmagic Design Film', 'Canon Log', 'Sony S-Log2/S-Gamut', and 'Sony S-Log3/S-Gamut3.Cine'. The 'Event' and 'Location' fields are also visible in the sidebar.

4) V-Log から709変換された事を確認します。

The screenshot displays the Final Cut Pro X 10.3 interface. The main preview window shows a video clip of a wooden clock with a white face and black hands, with a small figurine on top. The clock face has the brand name 'CITIZAN' and numbers 1 through 12. The interface includes a top menu bar with '4K 23.98p, Surround', 'Untitled Project', '17%', and 'View'. The right sidebar shows the clip's metadata:

<b>4096 × 2160   23.98p   Rec. 709</b>
