

AU-EVA1クリップ取り込みガイド (Win) EDIUS9 Ver. 9.002903

1/3

The screenshot displays the EDIUS 9.002903 interface. A text box in the upper left quadrant provides instructions for file import:

MOVは、[Video]
フォルダを選択
AVCHDは、[AVCHD]
フォルダを選択

An orange arrow points from this text box to the 'Video' folder in the source browser. The source browser shows a folder structure for 'Removable Media' on drive 'H:[A112]', with subfolders 'AVCHD' and 'Video'. The 'Video' folder is highlighted, and a white box around it is labeled 'SDカードからの取り込み' (Import from SD card). Below it, the 'Mync' folder is also highlighted with a white box, labeled 'Mync からの取り込み' (Import from Mync).

The main EDIUS interface shows a timeline with tracks for Video (V), Audio (A), and Title (T). The Audio Mixer (Peak Meter) is visible at the bottom right, showing levels for channels 1 VA, 1 A, 2 A, and 3 A. The system tray at the bottom indicates the date and time as 11:28 AM on 1/11/2018.

AU-EVA1クリップ取り込みガイド (Win) EDIUS9 Ver. 9.002903

2/3

The screenshot displays the EDIUS 9.002903 interface. The main preview window shows a Newton's cradle in a snowy landscape. The Source Browser on the right shows a folder structure with a clip named 'A112C001_180111_J703' selected. A context menu is open over this clip, with two blue callout boxes highlighting the 'Add to Bin' and 'Add and Transfer to Bin' options. A red arrow points to the clip name in the Source Browser. The timeline at the bottom shows a sequence with various tracks (V, A, T, A1-A4) and a timecode of 02:00:00:00.

ノート:

MOVスパンドクリップの場合、
スパンド部分での正しいオーディオ再生のために、
以下のやり方でシーケンスへ置いてください。

- 1) ビンで再生順にクリップを並べる。
- 2) 全てのクリップを選択する。
- 3) 右クリックし、
「シーケンス化」機能を実行する。
- 4) クリップが1つにまとまります。
